

Restoration Ecology Internship

Learning through experience...

Join the effort to to reduce the impacts of past and present human activities by improving resource quality in the Santa Monica Mountains Recreation Area.

- Participate in native plant propagation and planting.
- Work at the native plant nursery.
- Perform weed removal.
- Lead volunteer groups in the field.

To Qualify:

- ~ *Background in biology, botany, or ecology is helpful.*
- ~ *Interest in restoration ecology and willingness to work in the field is required.*
- ~ *Ability to identify plants of the Santa Monica Mountains is helpful.*
- ~ *Familiarity with basic plant propagation, tool use and greenhouse techniques are helpful.*

Work Conditions:

- ~ *Position involves substantial amounts of strenuous work in the field, including digging, carrying, and watering. Interns must be in good physical condition.*
- ~ *Commitment of 12 weeks, full time, is preferred although part-time arrangements may be made.*
- ~ *Interns may work both weekdays and weekends. Specific schedule will be determined based upon availability and project needs.*
- ~ *Valid drivers license is required, as intern may drive a government vehicle.*
